Lab 4

Exercise 1 Task 1

Step 4. Click **Next** two times to move to the **IP Addresses** tab. Use the Trashcan icon to delete the current network before you create your new IPv4 address space. Click the **Add an IP address space button** to add the new IPv4 address space. Select **IPv4**. In the **Starting address** field type **10.40.0.0** In the **Address space size** field select **/20 (4096 addresses)** Click **Add**

Step 5. In the Name field type **subnet0**. Verify that the Starting address is **10.40.0.0** and the Subnet size is **/24 (256 addresses)** Click **Add**.
