

Errata for Module 9 Lab

Lab 9a

Exercise 1

Task 6

Step 9. The correct Powershell is

```
$rgname='az104-09a-rg1'
```

```
$webapp=get-azwebapp -resourcegroup $rgname -name "<name of your web app>"
```

Replace the <name of your web app> with your web apps name.

Lab 9b

Task 2

Step 4. If the attempt to connect to your web page fails – wait several minutes to try again. You can verify connectivity by opening a PowerShell prompt on the lab computer as an administrator. Run **test-netconnection <public IP of Container> -port 80** to verify if port 80 is reachable. Then rerun the test using the FQDN.

Lab 9b

No errata reported.
